RCI Exterior Walls Technology & Science Course (Maritime Branch)

The RCI Exterior Walls Technology & Science Course was held on December 2-3, 2014 at the Delta Fredericton in Fredericton, New Brunswick. 21 persons attended and gained a fundamental understanding of exterior wall technology and terminology. The course covered a broad range of topics which included types and function of exterior walls, moisture movement, design objectives, and building code requirements.

Special thanks are extended to our presenter Ted Sheridan.

All attendees received 16 RCI Continuing Educational Hours (CEHs) for the two day course. The program included course materials, breakfast and lunch.
