## RCI's Stucco & Exterior Finish Cladding System

RCI Ontario Chapter held a 2 day course at their headquarters in Richmond Hill November 12<sup>th</sup> & 13<sup>th</sup>.

The Stucco and Exterior Finish Cladding Systems course is the second specific exterior wall course that builds on the fundamentals presented in the Exterior Walls and Science. The purpose of the course is to provide essential information on material properties, design principles, evaluation techniques, and repair methods for stucco and EIFS.

Topics covered in this course included:

- **Sound Transmission**
- **Thermal Bridging**
- **Coatings**
- **Testing Methods**
- **and the various codes and standards impacting stucco and EIFS systems**

This in-depth course is recommended for those that have taken Exterior Walls Technology and Science, and want to further expand their knowledge of exterior wall systems. Stucco and Exterior Finish Cladding Systems will also serve as a good review course for those interested in taking the Registered Exterior Wall Consultant exam.

**RCI Ontario would like to thank our presenter Mr. John Edgar of John R.S. Edgar Consulting Inc.**
