January 20, 2012

Program Location:
 Toronto Construction Association
 70 Leek Crescent
 Richmond Hill, Ontario L4B 1E4

Program Includes:
 Course text book, continental
 breakfast

Questions:
rci@rci-onchapterinc.ca

Roof Technology & Science I is a two-day course designed for roof consultants, building owners, architects, and engineers who want to better understand roof construction, materials and performance

The course is organized into six main topic areas:

- Roof decks and drainage
- Thermal and Moisture design, calculations and materials
- Bituminous systems including bitumens, reinforcements, BUR membranes and surfacings for bituminous systems
- Single-ply roofing systems
- Spray-applied polyurethane roofing systems
- Protected-membrane roofing Systems

Students will be able to complement experience with low-slope roofing systems by adding a deeper understanding of roofing materials, design principles and testing procedures.
